Dear Dr Toker and Dr Tal Lavie,

It is with great pleasure that I write to you today regarding our company, Pharma Natura (Pty) Ltd.

Guy Wertheim Aymes, the Founder of Pharma Natura, started the company in 1959 when he opened the first natural health shop in the center of Johannesburg, South Africa.

The manufacturing of Weleda products started in 1965 and a range of Vitaforce vitamin supplements were added in 1974. Many new products and innovations soon followed - so that today, the company can boast over 6,000 registered medicines and can proudly state: It is the only pharmaceutical company in the world that manufactures: anthroposophic, herbal & homeopathic medicine, nutritional supplements & tissue salts

- ❖ Pharma Natura's 12,000sq.m manufacturing plant has some of the most advanced production equipment in the world. Not only does this increase capacity and efficiency as a manufacturer, but it allows, Pharma Natura to produce quality beyond our competitors which cannot easily be matched.
- ❖ Our plant has the capacity to manufacture over 600 products.
- ❖ We produce: capsules, creams, liquids, paste's, tablets & teas.
- ❖ We also manufacture/make/potentise: mother tinctures, all homeopathic simplexes and standard complexes, all 11 tissue salt simplexes and 16 combins.
- ❖ Our natural medicines are available in: liquids, powders and tablets
- ❖ The Pharma Natura Manufacturing Facility is cGMP Accredited by The Medicines Control Council (MCC) of South Africa.

The Pharma Natura Quality Assurance Team has extensive knowledge and experience in: Good Documentation Practices (GDPs), Good Manufacturing Practice (GMP), SOPs and principles of product complaints, product recall, returned goods and change control.

The team is also proficient in validation protocol, batch documentation and investigation reports and are familiar with facilities audit.

The Quality Assurance team is integral to maintaining and managing GMP and quality related issues as well as various regulatory requirements.

We are very interested to start the distribution and marketing of our products in Israel as we have had a long standing friendship with Dr Rachel Gitai, and we believe that it is always much easier to do business within foreign markets if you have a business acquaintance.

We look forward to doing business in Israel, and to bring health and happiness to all consumers that use our products.

Your Sincerely

[Winston Goosen](#)

Business Development Manager
